

Regarding the FCC consideration of LPFM stations taking priority over current FM translators; stations such as K-Love may be affected. K-Love is a part of my day, so much so that I contribute to keep it on the air! There is so much on the radio that is inappropriate, K-Love is one of the few stations I know my children will not be subjected to foul language and sexual innuendo. Children get enough of this on TV, yes even the shows for children try to stay on the edge of decency. K-Love provides news and encouragement, a clean place to listen. There are many stations that are there for those who want to hear the grunge. Please leave stations such as K-Love and other clean air stations for the public interest. We need the break from the alternative for adults and children. Thank you.
